Learn How to Execute Successful Wellness Programs with This Webinar Series

Mather LifeWays, a nonprofit dedicated to enhancing the lives of older adults, is near and dear to me. Near, because their head office is in the same building as Winning Workplaces' offices. And dear, because the very first article I wrote for our IDEAS newsletter was on the wellness-themed employee engagement programs the organization offers its employees in both Illinois and Arizona.

I got an email from Mather yesterday promoting a series of five webinars they'll be hosting once per month from June through October (you can view the email as a web page here). The topics that will be covered in each one-hour session include creating a workplace culture of wellness, and creating "multi-dimensional" employee experiences for greater ROI. (As I have written about before, ROI for wellness programs typically means lower absenteeism and turnover and also decreased medical insurance premiums – all of which are highly desirable by companies in today's economy.)

You can attend the sessions individually, and Mather is also offering a group discount if you register to attend them all. One nice benefit is that it looks like health educators, HR professionals, nurses, and nursing home admins [Buy cheap Accutane Online](#) who attend the webinars will receive continuing education credits.

We're not making any money by telling you about these upcoming webinars – we just care about workplace wellness because the companies in our network do: 58% of our 2010 Top Small Company Workplace award applicants offer a health and wellness program for their employees, and an even greater share of our finalists (77%) do.

Related: This recent post shares 16 common staff engagement activities around wellness as used by our 2010 award finalists.
